

The storage and shipping of your valuable cell banks must be put in the hands of a highly experienced, technically capable and reliable company.

At BioReliance, we make it our business to meet your biorepository needs!

BioReliance operates state-of-the-art, cGMP compliant biorepository facilities both in the USA and the U.K. and have provided cell storage service to clients for more than 20 years. Both facilities specialize in the secure, long and short term storage of mammalian and bacterial cell lines and viral materials.

### Secure biorepository facilities

- Restricted access to facilities by authorized personnel only
- Support staff on site and 24 hour emergency call out
- Security camera monitoring

### Meet your temperature and storage requirements

- Liquid nitrogen vapor (LN2), ultra cold (-80°C) and others to meet custom requirements
- Split storage of material on site (bi-continental storage also available)
- Inventory control system (full audit trail for material)
- All banks are certified free from mycoplasma and tested for sterility prior to storage

### State-of-the-art equipment and validated temperature monitoring system

- Fully validated (IQ/OQ/PQ)
- Real-time, 24-hour temperature monitoring system
- System redundancy and back-up LN2 and -80°C freezer units on site
- Emergency power generator

### Global cGMP compliance

- Comprehensive processes to ensure regulatory compliance
- MHRA & FDA accreditation
- Quality management system

With highly trained technical staff, years of experience in the industry, and world class facilities, you can rely on BioReliance as your go to partner for all your cell storage needs.

To learn more about our biorepository services, please visit the BioReliance website or contact our cell banking and biorepository group.
