

BioReliance presents the redesigned **first page** of our Certificate of Analysis (“C of A”) for all GMP assays. This new format is easier to read with test results clearly stated in a summary table. We’ve also included new information that you will find useful (see complete list on the right), such as *Test Start Date* and *Test Complete Date*. Most importantly, no information that was previously reported has been removed and now we provide one global standard for our C of A documents.
